DETAILED ACTION

Examiner acknowledges response by applicant's representative received 9/9/05.

The office action of 7/5/05 has been withdrawn. An office action on the merits is presented below. Please excuse the delay in prosecution.

Claim Rejections - 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

1. Claims 17-32 are under 35 U.S.C. 103(a) as being unpatentable over Sankyo K.K. (733).

Sankyo discloses, as his invention, a Game Machine.

Regarding claim 17

Sankyo teaches a gaming machine with a plurality of independently rotatable reels, rotatable about a common axis (see figures 19, 22 & 24), a reel sheet, with a plurality of symbols, attached to each reel (see figure 22), a display window for viewing

Application/Control Number: 09/208,696

Art Unit: 3711

symbols of at least two parallel lines to the common axis when stopped (see figure 19) a display that has 2 or more identical symbols appearing serially, as shown in the main figure of his invention, figure 22 and in figure 19.

Sankyo does not explicitly show, in figure 22, a symbol appearing serially on his center reel; however, he teaches that symbols appearing serially are known by his illustration in fig. 22 (see outer reel). It would be a mere duplication to include symbols in serial on the center reel. Such duplication is well known in the art.

Furthermore, implicit in his teaching is appearance of each symbol on each reel since his invention teaches three "7" or "Bar" (or other patterns) visible through 202, 203 & 204 is the probability being sought [0058]. Since other patterns may be used, to meet these criteria all patterns would need to be on each reel.

Regarding claim 18

Sankyo teaches a display window that provides for the viewing of symbols when reels are stopped and the displaying of a winning line and lines that do not provide a winning state (see figure 19 & 21).

Regarding claim 19

Sankyo teaches a display with three reels (see figure 19).

Regarding claims 20 & 30-31

Examiner takes official notice that predetermined win combinations presented diagonally or on the win line of slot machines are also known in the gaming art.

Art Unit: 3711

Regarding claims 21 & 28

Sankyo K.K. teaches a display of one symbol appearing serially at least two times (see figure 22).

Regarding claims 22 & 29

Examiner takes official notice that predetermined win combinations are also known in the gaming art.

Regarding claims 23, 26, 27 & 32

Examiner takes official notice that predetermined win combinations are also known in the gaming art and further it would have been obvious to one of ordinary skill in the art at the time the invention was made to duplicate the symbols of each reel since it has been held that a mere duplication of the essential working parts of a device involves only routine skill in the art.

Regarding claim 24

Sankyo does not explicitly teach the colors of his symbols. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use whatever color desired since it would only depend on the intended use of the assembly and the desired information to be displayed. Further, it has been held that when the claimed printed matter is not functionally related to the substrate it will not distinguish the invention from the prior art in terms of patentability. *In re Gulack*, 217 USPQ 401, (CAFC 1983). The fact that the content of the printed matter placed on the substrate may render the device more convenient by providing an individual with a specific type of

Art Unit: 3711

color does not alter the functional relationship. Mere support by the substrate for the printed matter is not the kind of functional relationship necessary for patentability.

Regarding claim 25

Examiner takes official notice that predetermined win combinations are also known in the gaming art and further it would have been obvious to one of ordinary skill in the art at the time the invention was made to duplicate the symbols of each reel since it has been held that a mere duplication of the essential working parts of a device involves only routine skill in the art.

Regarding the type/combination of symbol/indicia on each reel, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use whatever indicia desired since it would only depend on the intended use of the assembly and the desired information to be displayed. Further, it has been held that when the claimed printed matter is not functionally related to the substrate it will not distinguish the invention from the prior art in terms of patentability. *In re Gulack,* 217 USPQ 401, (CAFC 1983). The fact that the content of the printed matter placed on the substrate may render the device more convenient by providing an individual with a specific type of color does not alter the functional relationship. Mere support by the substrate for the printed matter is not the kind of functional relationship necessary for patentability.

Response to Arguments

Applicant's arguments filed 9/9/05 have been fully considered but are not considered persuasive. Examiner agrees with applicant that the reference to Hooker is no longer relevant. Examiner however disagrees with applicant's arguments regarding symbols in serial and symbols appearing on all reels. Sankyo does not explicitly show, in figure 22, a symbol appearing serially on his center reel; however, he teaches that symbols appearing serially are known by his illustration in fig. 22 (see outer reel). It would be a mere duplication to include symbols in serial on the center reel. Such duplication is well known in the art.

Furthermore, implicit in his teaching is appearance of each symbol on each reel since his invention teaches three "7" or "Bar" (or other patterns) visible through 202, 203 & 204 is the probability being sought [0058]. Since other patterns may be used, to meet this criteria all patterns would need to be on each reel.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and are cited to show the state of art with respect to features of the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to *Dolores R. Collins* whose telephone number is (571) 272-4421. The examiner can normally be reached on 8.00 A.M. - 4:30 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, *Eugene Kim* can be reached on *(571) 272-4463*. The fax phone number for the organization where this application or proceeding is assigned is *571-273-8300*.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
